Data Subcommittee
Of the JJOC
02/26/2019 Minutes of Call

No agenda was generated for today, allowing us to have a free-flowing call. Two things to address are:

1. Immediate data needs
2. Data sharing MOU

Immediate Data Needs

First 20-25 minutes of the call was dedicated to discussing the definition of recidivism and if sufficient data is currently available. Melanie Waters suggested OJA likely has all the information needed, and that it will be available once Odyssey is fully online.

Amy Raymond and Melanie Waters discussed a DMC report that OJA already sends to KDOC regularly. Megan Milner and Sean Christie will review the report to see if it has the necessary information and format to be appropriate to model for recidivism.

All parties also discussed the possibility of talking with KBI to see if they can create a recidivism report using the information that both OJA and KDOC supply to KBI. Jen Christie will follow up with Leslie Moore, of the KBI, to determine if this is possible.

MOU

The MOU that had previously been signed by KDOC and DCF was then discussed.   Amy Raymond expressed that much of the information outlined in the MOU is already shared between OJA and KDOC and wondered if an MOU is necessary.   Jen Christie asked if any data was shared between OJA and DCF. Melanie Waters said that she does not believe so. Melanie Waters will investigate.

Amy Raymond will look at the MOU and make recommendations for how to write it so enough information can be shared while being specific enough.
